

Hidden Systems Security

Installation & Activation Guide

Thank you for choosing Hidden Systems Security. Follow the steps below to install and activate your protection. This should take less than five minutes.

Setup Steps

- 1 Download the installer**
Save the file we sent you (HiddenSystemsSecurity.exe) to your Downloads folder.
 - 2 Run the installer**
Double-click HiddenSystemsSecurity.exe to start.
 - 3 If Windows shows a blue “Windows protected your PC” screen**
This is normal for new software. Click **More info**, then click **Run anyway** to continue.
 - 4 Enter your license key**
When the activation screen appears, type in the license key we sent you, then click **Activate Now**.
 - 5 You're protected**
The app will open automatically. You'll see a green “PROTECTED” badge at the top once activation is complete. The app runs quietly in your system tray in the background.
-

What Hidden Systems Security Does

- Monitors your network connections for suspicious activity
 - Checks running processes against known threat patterns
 - Lets you scan your Downloads, Desktop, and Temp folders on demand
 - Keeps a security log of everything it checks
-

Good to Know

- You can close the app normally using the **X** button in the top right corner.
- Minimizing the app keeps it running quietly in your system tray — look for the shield icon near your clock.

- You can turn “Start with Windows” on or off anytime from Settings.
- If a connection you trust gets flagged, add it under Settings → Trusted IPs & Websites so it won't be flagged again.

Need help?

If you run into any issues during setup or activation, message us on WhatsApp and we'll help you right away.
